

MARK TEDRA

Pasig City | LinkedIn: [Mteds](#) | GitHub: [Teds.M](#) | 09389389856 | marktedra29@gmail.com | Portfolio: [TedsM](#)

EDUCATIONS

Arellano University | *BS Information Technologies*
Academic Awards: Magana cum laude BSIT

Pasig City, Philippines
Mar. 2019 – May. 2023

WORK EXPERIENCE

Quality Assurance Associate
Lay – Bare Waxing Philippines Inc.

Hybrid Setup, Mandaluyong
Mar 2024 – May 2025

- Develop a test plan and create a roadmap aligned with the function’s requirements.
- Planned, coordinated, and executed User Acceptance Testing with P.O. (Project Owners) to validate business requirements and ensure all the functions and requirements were met.
- Collaborate with the developers’ team to prioritize and resolve the bugs and issues throughout the QA process.
- Performed API testing using Postman to ensure the endpoint met functional and performance requirements.
- Take the lead in production testing to identify and escalate live environment issues to improve user experience.
- Managed UAT completion to secure stakeholder sign-off, ensuring the product met business requirements before release on the production environment.

Developer
NOAH Business Applications

Remote, Makati
Jan 2023 – Apr 2023

- Responsible for application testing in a specific project, testing the functionality and efficiency of the app.
- Assisted in developing, testing, and debugging the web application using HTML, CSS, and JavaScript, and participated in daily stand-up, planning, and meetings
- Wrote report documentation that details errors and bugs to address all the issues within the application.

PROJECTS

THE OASIS

Technologies: Next.js, React, JavaScript, HTML, CSS, Tailwind, Supabase, Node.js, NextAuth

- Developed a full-stack hotel management web application, building both frontend and backend components.
- Implemented key features such as cabin booking, customer management, and an administrative dashboard.
- Utilized Supabase for database management and authentication, integrated NextAuth for secure user sessions, and designed a responsive UI with Tailwind.
- Implement state management with React Context API to reduce app load time by 5%

FIND VET AND GROOM

Technologies: PHP, JavaScript, HTML, CSS, Bootstrap, MySQL

- Built a web application that helps users locate the nearest veterinary and grooming services in their area
- Integrated Google Maps API to detect and utilize the user's geolocation for accurate service recommendations.
- Designed a responsive interface using Bootstrap and implemented backend logic with PHP and MySQL for dynamic data handling.

TECH-QUIZ

Technologies: React, HTML, CSS, JavaScript, MockAPI

- Developed a tech quiz web application using React to test users on fundamental computer knowledge.
- Integrated MockAPI to simulate a backend, storing and fetching custom quiz question data via API endpoints.
- Customized and hosted the application on Netlify for live deployment and seamless frontend access without the need for a local server.

COURSES / SEMINAR

Complete JavaScript Course 2025: From Zero to Expert

January 2025 - Present

The Ultimate React Course 2025: React, Next.js, Redux

January 2025 – June 2025

Techtutor-2021 The new digital life

October 2021

SKILLS

Programming Language & Framework: JavaScript, .NET, Java, PHP, HTML, CSS, Tailwind, React, Next, Supabase, and MySQL

Tech stack: Git, Netlify, MS Access DB, Postman, and Vercel

COMPTIA, System Application and Production in Data Processing (SAP)
